Innovations are built together

80 years of experience

in serving weapon manufacturers

Meconet is a family-owned European producer of demanding precision metal components. Meconet has almost 80 years of experience in springs and innovative stampings in combination with excellent client care and know-how.

Innovations are built together

We believe in co-operation and ability to improve your business. Together we can cut costs and shorten the time-to-market. Once we understand your needs, we can support you through-out the lifecycle: from product design and prototypes to efficient volume production.

Investments in new technologies and continuous development of processes keep our competitiveness, quality and delivery performance on world-class level.

We promise you:

Experience to support your R&D operations in spring design, calculation and simulation

Lean production and **fast deliveries** for prototypes to high volumes

Wide range of springs and wire forms

- Compression springs (Ø 0,2–16,0 mm)
- Extension springs (Ø 0,2–16,0 mm)
- Torsion springs (Ø 0,2–8,0 mm)
- Wire forms (Ø 0,2–8,0 mm)
- Flat springs (0,1–6,0 mm)

Customization – Various raw materials, shot peening, pre-setting, grinding and coating.

High precision and quality assurance – 100 % quality inspection + measurement reports
