Innovations are built together

E-mobile revolution:

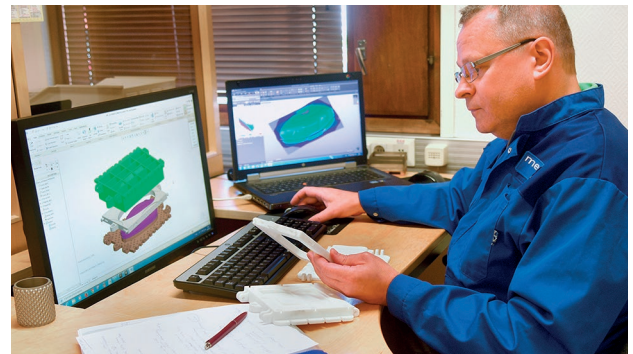

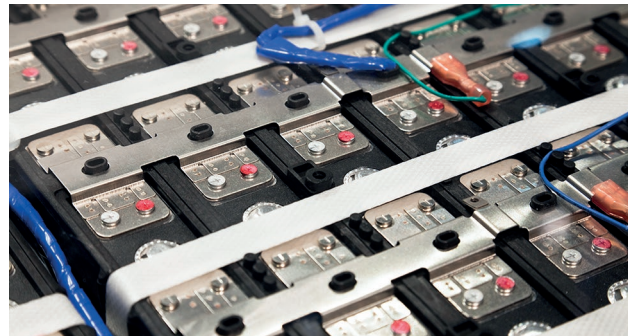

Battery tech solutions for e-vehicles

Meconet is a European producer of precision metal components. Meconet offers services through-out the battery-system lifecycle: design-support, prototypes, production tools and serial production of various metal components and assemblies.

Innovations are built together

We believe in co-operation and ability to improve your business. Together we can cut costs and shorten the time-to-market. Once we understand your needs, we can support you through-out the lifecycle: from product design and prototypes to efficient volume production. Investments in new technologies and continuous development of processes keep our competitiveness, quality and delivery performance on world-class level.

We promise you:

Development & Expertise

- Front end engineering & design support
- Professional APQP project management and procurement

Production Technology

- Deep Drawing
- Stamping
- Wire-forms and springs
- Assembly

LEAN Deliveries

- On Time Delivery
- Highest quality
- Optimized Logistics

Meconet expertise in battery systems

- Battery Covers
- Module components
- Busbars
- Contacts/springs

Innovative solutions for

- Functionality and manufacturability
- Weight reduction
- Optimized cost
- Production efficiency & Safety
